[0/0]

[Metric / finding]

Main signal

[Write the clearest one- or two-sentence takeaway here. Keep it short enough to understand in about 20 seconds.]

REPEATED SIGNALS

[0/0] [Repeated issue / observation]

[0/0] [Repeated issue / observation]

[0/0] [Repeated issue / observation]

[0/0] [Repeated issue / observation]

[0/0] [Repeated issue / observation]

[0/0] [Repeated issue / observation]

[0/0] [Repeated issue / observation]

[0/0] [Repeated issue / observation]

Design / scope note

[Use this space for a short note explaining an intentional survey omission, known constraint, sample limitation, or other context that changes how the results should be read.]

FLOW ANALYSIS & IMPROVEMENT PRIORITIES

Frequency / ranking chart template

How often each issue was reported

Replace the placeholder labels and bar lengths with the actual results.

Chart note

[Explain the denominator or sample size here. Example: 4 welders surveyed; counts show how many checked each item.]

FLOW ANALYSIS & IMPROVEMENT PRIORITIES

Top priorities / theme grouping template

Top priorities grouped by theme

Use this page for starred items, handwritten priorities, or grouped themes.

[Theme 1]

[Theme 2]

[Theme 3]

[Theme 4]

[Theme 5]

WHAT STANDS OUT

[Finding 1]

[One or two sentences explaining why this finding matters.]

[Finding 2]

[One or two sentences explaining why this finding matters.]

[Finding 3]

[One or two sentences explaining why this finding matters.]

Examples / evidence

[Optional short examples, direct phrases, or specific observations that help the chart make sense.]

FLOW ANALYSIS & IMPROVEMENT PRIORITIES

Priority / action comparison template

Use this page to compare findings to an existing priority list, standard, or action plan.

#	Priority area	Level	Evidence / next step
[1]	[Priority area]	[LEVEL]	[What the analysis showed and what should happen next.]
[2]	[Priority area]	[LEVEL]	[What the analysis showed and what should happen next.]
[3]	[Priority area]	[LEVEL]	[What the analysis showed and what should happen next.]
[4]	[Priority area]	[LEVEL]	[What the analysis showed and what should happen next.]
[5]	[Priority area]	[LEVEL]	[What the analysis showed and what should happen next.]

NEW [New signal / track separately]

[Describe any important issue that did not exist in the original priority list.]

Keep the scope small

[Pick 1-2 priorities, standardize the change, watch the result, measure it, then move to the next constraint.]
